

LAKE BUENA VISTA GOLF COURSE

ORLANDO, FLORIDA
Project Highlight

Installation	2010
Project for	Disney's Lake Buena Vista Golf Course
Features	(3) 10' x 30' Atlantis Trusses Custom Horizontal Rail IPE Decking UHMW Rub Rail / Fender

Project Summary

Disney's Lake Buena Vista Golf Course is rated an impressive 4 stars by Golf Digest. This is one of the few courses that have hosted PGA Tour, LPGA Tour and USAGA events. Before the addition of a GatorBridge, a timber bridge was in its place. The timber bridge could not keep the modern, manicured aesthetic that matched the course atmosphere even with intensive maintenance programs. So GatorBridge set off to design a 90' aluminum bridge for golf cart and pedestrian traffic. The new golf cart bridge has all of the benefits of aluminum including minimal maintenance, sturdy load capacity and modern design that fits with the natural surroundings. The bridge design is a version of our Atlantis Truss with Horizontal Rail. After fabrication, the entire golf course bridge was powder coated a custom shade of brown. Ipe decking and a protective UHMW rub rail finished the clean, natural look.
